Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, altered the way I believe.

(Prof. Loyce Runolfsson Jr.)

ANIMAL HISTOLOGY (PART 1)

Book Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Lecture Notes on Cytology and General Histology | This is an introductory book in cytology and general histology for the undergraduate for medical and Veterinary Medical students. This book will deal with cells and tissues from mammals and birds. This book is intended to give the students enough experience with the materials in a simple way so that, at the end of it they should be able to identify normal cells and tissues prepared by standard methods for light microscopy and to some extent the electron microscopy. We tried to make this course as easier as possible by using more drawings and illustrations either made by the author or by getting them from other sources as referenced at the end of this book. The new methodology of histology teaching encourages the combination of electronic course in association with the traditional teaching method to make the matter even more enjoyable and effective for 1st year veterinary students. Therefore, this book was introduced in association with an electronic course. The electronic course will provide a series of teaching materials and animations urgently needed for the undergraduate students to better understand this subject in more attractive way. | Format: Paperback | Language/Sprache: english | 148 pp.
