Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: .operation per day 300 days pei year (many heaters run 24 hours per day, 365 days per year); this amounts to 105,000,000,000 lb. of coal per year, or 50,000,000 tons, worth at \$3.00 per ton, \$150,000,000. The saving due to the use of Cochrane Heaters is 1 to each 11 F. rise in temperature. On the average, the water is raised from 100 F. to 210 F. using steam at atmospheric pressure, giving a saving of 10. Cochrane Heaters are thus saving about \$15,000,000 per year, which is vastly more than the heaters cost. In addition, Cochrane Oil Separators are saving millions of tons of coal by purifying exhaust steam so that it can take the place of live steam in heating and drying coils, low-pressure turbines and industrial processes. Sorge-Cochrane Hot Process Water Softeners are saving millions by keeping scale and corrosive substances out...

Reviews

This ebook can be worthy of a read, and much better than other. I have read and i am certain that i am going to planning to go through again once again in the future. You may like just how the writer compose this book.

-- Mr. Grant Stanton PhD

A whole new eBook with an all new standpoint. It is actually rally fascinating through reading through time period. You wont truly feel monotony at anytime of your own time (that's what catalogues are for relating to when you request me).

-- Claire Bartell
